

Specialists in Engineering Solutions for the Recycling and Material Handling Sectors

## The Anaconda **TR** Range of Mobile Tracked Conveyors are designed for the Material Handling Sector and aim to reduce production time and save stockpiling costs.

The **TR100** is the largest of our Tracked Conveyor range. Fully equipped with a 100' Stockpiling Conveyor it allows for stockpiling or feeding of a range of applications. The **TR100** has a variable speed conveyor in order to facilitate the most difficult applications such as sand, gravel, aggregates, compost, coal and wood chip.

The **TR100** can be shipped world wide on a low loading trailer; reducing shipping costs for this mammoth conveyor. Set up is simple and the machine can be running within 10 minutes of delivery. Commissioning is aided with the hydraulic controls to fold and unfold the Conveyor for transport and control the stabilising bars/jack legs.

Anaconda stock a full range of spare parts as a display of our commitment to provide a dedicated and responsive service to all our customers.

## Specialists in Engineering Solutions for the Recycling and Material Handling Sectors

### SPECIFICATIONS AND TECHNICAL DETAILS

#### Features

- 100' (31M) Long plate framed conveyor body
- Variable Speed
- Hydraulic folding head and tail section as standard
- Hydraulic raise and lower of front and rear legs
- Impact bed under feedboot as standard
- 3 Ply 42" (1050mm) Wide plain belt as standard

#### Engine Options

- 3B - JCB444 EcoMAX Engine - 68KW / 91HP
- Stage 5 Deutz 2.9 L4 Engine - 50KW / 67HP

#### Options

- Side skirting to enclose belt
- 4 Ply plain belt
- Chevron belt
- Belt weigh scale
- Overband Magnet

#### Weight

- 19,000KG

### WORKING AND TRANSPORTATION DIMENSIONS

Anaconda sell and distribute our entire product portfolio via a Dealer Network, For your nearest dealer please contact us or visit our website.

Anaconda reserves the right to make changes to design without reservation and without notification.
